

Two Dice Plus Ten 4-Grid

Tic-Tac-Toe

- Each player chooses a color token (tiles, cubes, chips).
- Players each toss die. Highest number goes first.

How to Play

- Toss 2 dice, find the sum, and add ten to the sum.
- Player finds the sum on any of the grids and places a token on it.
- If number is not available on any grid, lose a turn.
- If player tosses two ones or two sixes, toss again.
- When no more winning plays are possible, players count their scores to find the winner.
